

Type: Event

Prerequisites: Laptop/PC with a mouse, monitor/display for the participant, and a small stall/table setup. A projector or secondary display can be used to show the leaderboard.

Name of Event: Catch the Google

Description:

Catch the Google is a simple, fast-paced one-minute reaction game designed to be accessible to everyone, regardless of technical background.

A Google-themed target appears on the screen and moves around randomly. The participant has 60 seconds to click the target as many times as possible. As the game progresses, the target gradually becomes smaller and moves faster, increasing the difficulty.

Fake targets can also be introduced during the later stages of the game, requiring participants to react quickly while identifying the correct target.

The participant's final score is recorded, and a live leaderboard can be maintained throughout the event. This encourages participants to compete against previous players and attempt multiple rounds to achieve a higher score.

Approximate Time Per Participant: 1–2 minutes

Any Additional/Extra Information:

- The game should require only mouse clicking, making it extremely easy for anyone to participate.
- The difficulty can increase throughout the 60-second round.
- A live leaderboard can display the top scores of the day.
- Participants can be given the option to replay and try to beat the current high score.
- Small GDG stickers, chocolates, badges, or other prizes can be given to participants who achieve particularly high scores.
- The visual design of the game can use Google/GDG-inspired colours and branding to make the activity feel connected to the club.
